

Organoid: features with q < 0.05

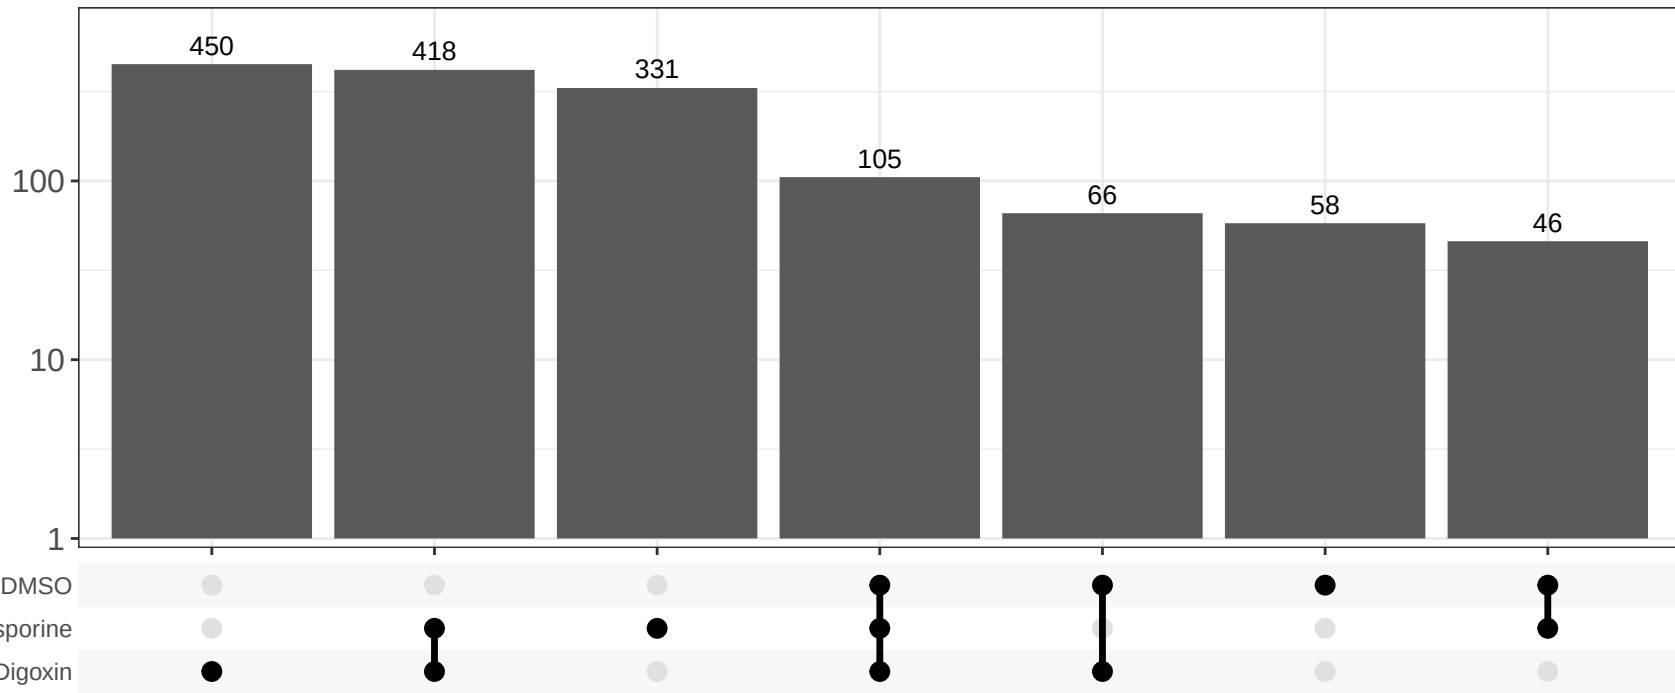

Single cell: features with q < 0.05

Patient x feature pairs with  $q < 0.05$  (log10)

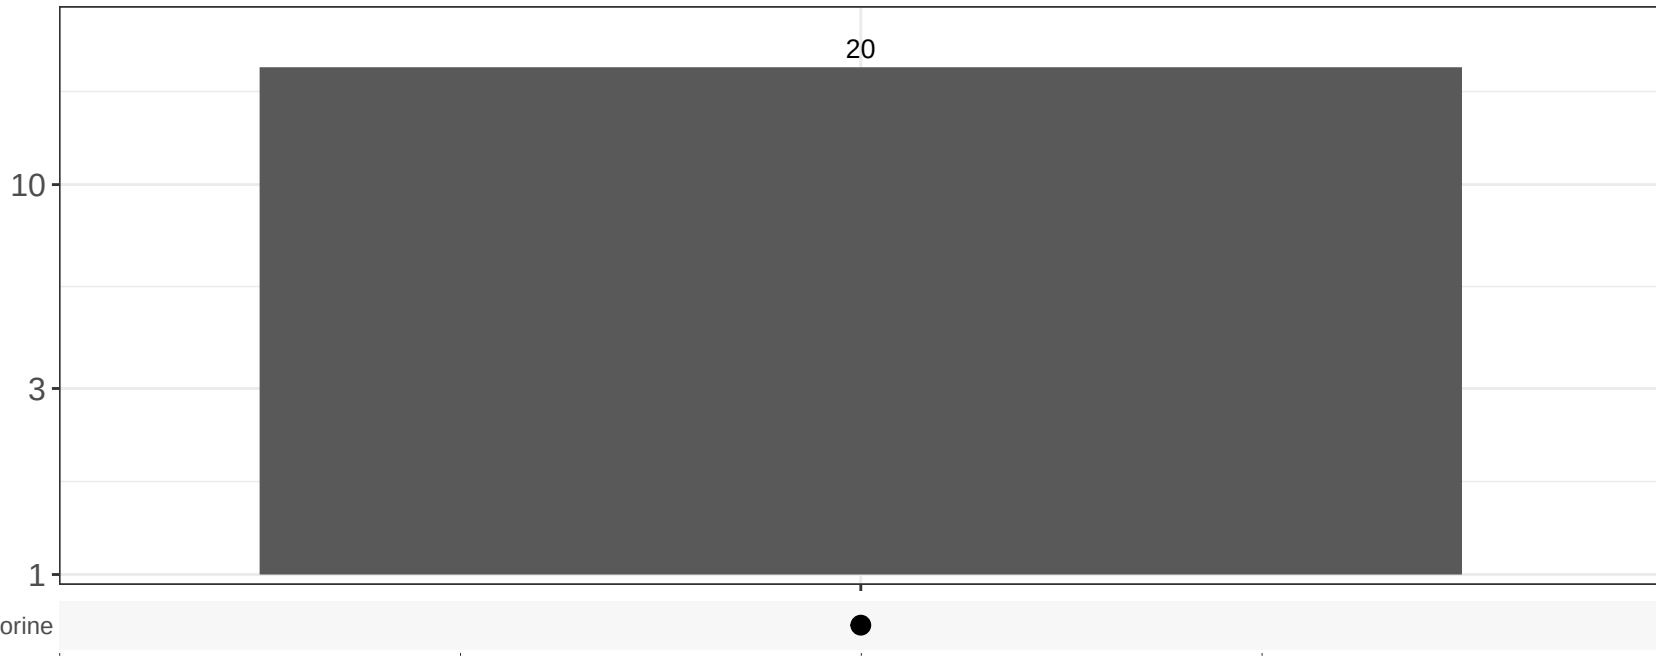

Organoid | Within patient

## Organoid | Across patients

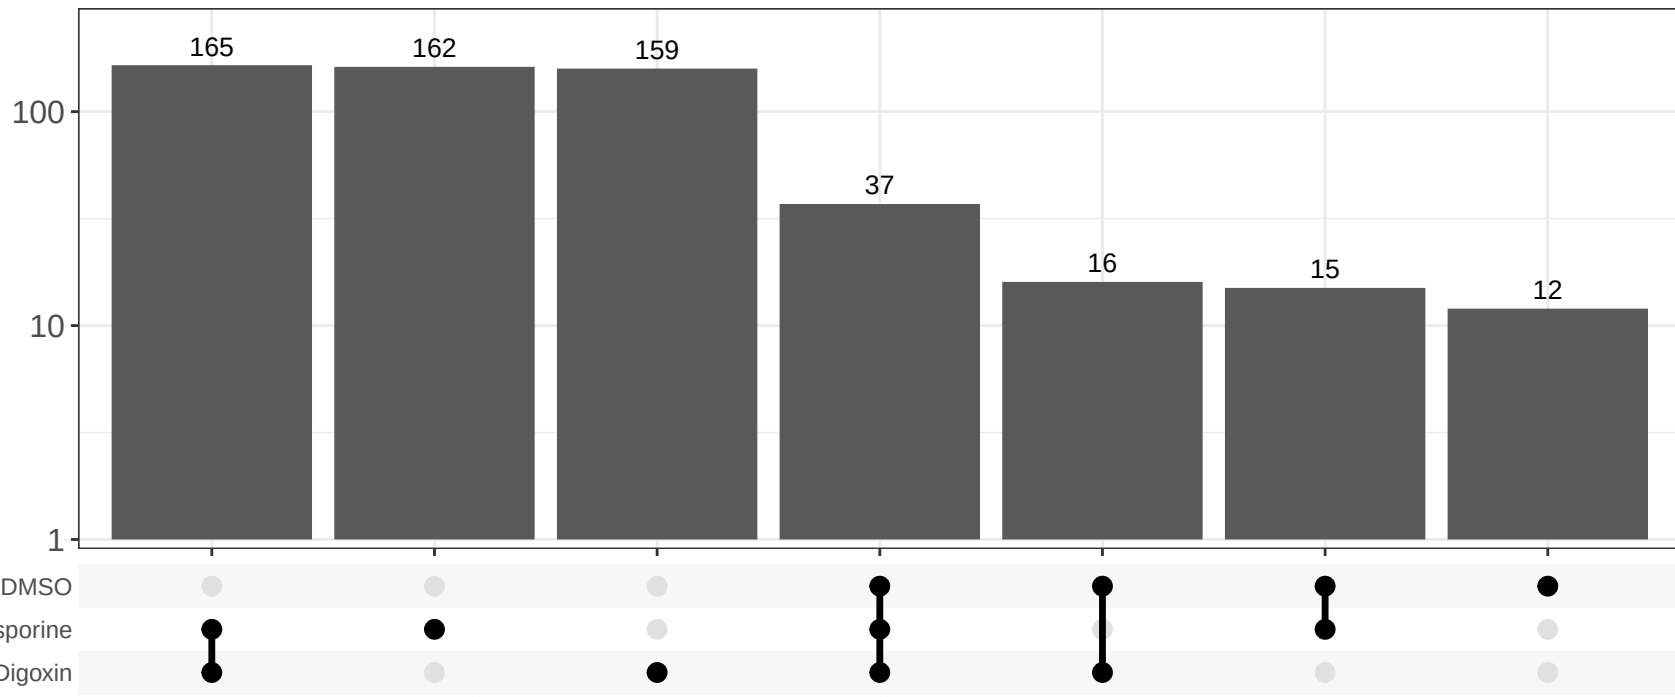

No significant features for: MEKi vs DMSO, MEKi vs Digoxin

Features with  $q < 0.05$  ( $\log_{10}$ )

Tumor type x feature pairs with  $q < 0.05$  (log10)

## Organoid | Within tumor type

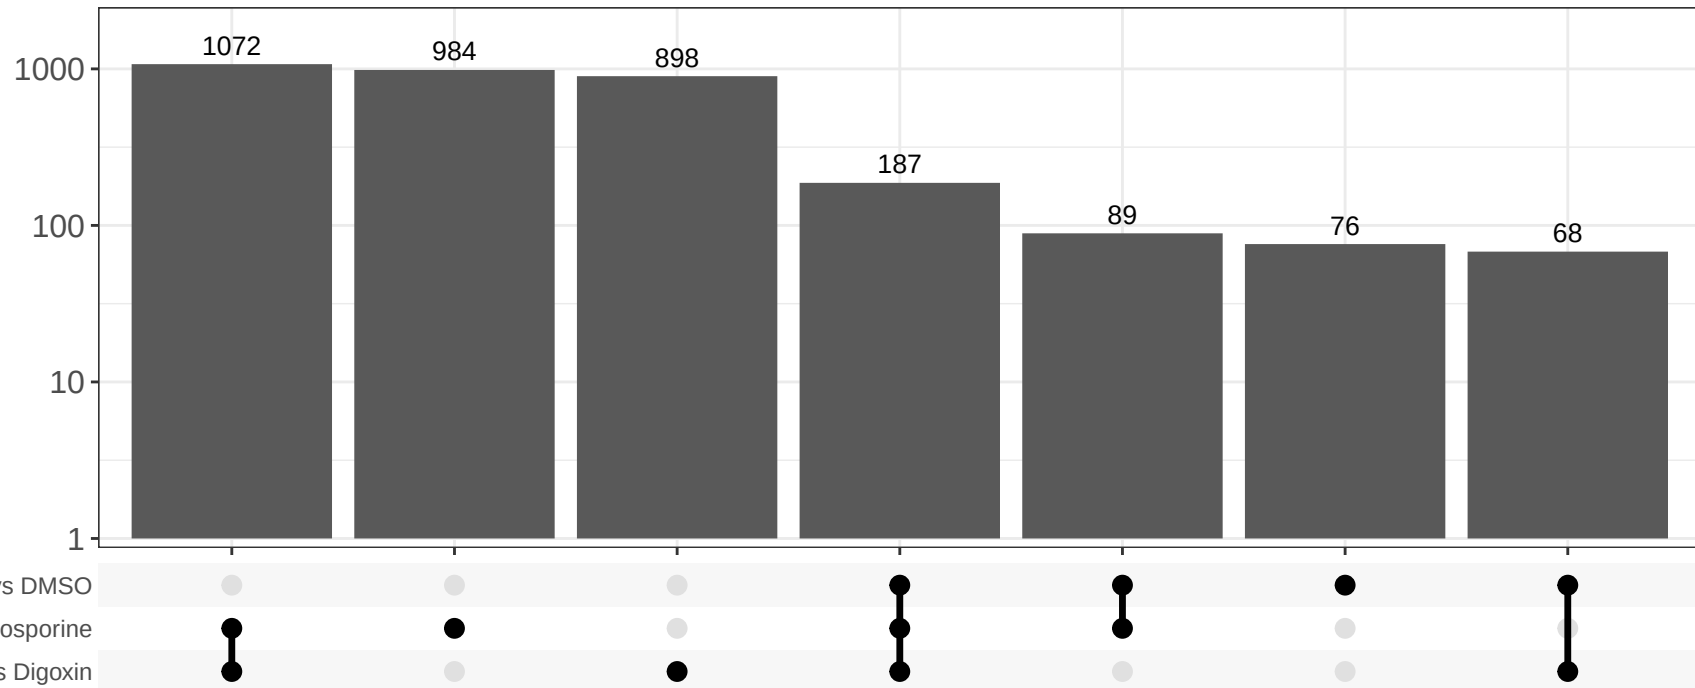

No features with  $q < 0.05$

No features with  $q < 0.05$
